

Evaluation form for reviewers

Dear Reviewer:

Please evaluate the following criteria indicating the degree of acceptance according to the scale: Agree, Partially Agree, Disagree.

Criteria	Agree	Partially Agree	Disagree						
Is the title brief and does it adequately describe the contents?									
Is the abstract sufficiently informative with respect to the main aspects?									
Do the keywords allow appropriate retrieval of the information in databases and on the Internet?									
Is the first part an up-to-date and interesting introduction to the subject of the study?									
Is the Materials and methods section correct and can the study be replicated or reinterpreted on the basis of the information it contains?									
Is the quality and organization of the tables and figures satisfactory?									
Was the evaluation of the data properly performed with statistical methods?									
Are the results reasonable?									
Is the discussion correct and is it circumscribed to the information presented?									
Are the conclusions warranted, considering the methods and results?									
Are all references up to date and pertinent to be cited in the paper?									
Is the organization of the paper and grammar satisfactory?									
Is the length of the manuscript appropriate?									
Was an ethical line followed in the research?									
Suspensions of plagiarism or fraud If you suspect that the reviewed work has parts that are copies of other works (plagiarism), or if it seems to you that the results are not true (fraud) please contact the publishers and provide as much background and detail as possible.									
Comments to authors Enter here any other comments you consider relevant. Here you can indicate if there are any errors of interpretation, inaccurate or ambiguous statements, if certain parts of the document should be expanded or condensed, etc. Condense certain parts of the document, etc. You can also make observations as comments in the attached word document and send it through the platform. Either option is valid. Your comments on how to improve the document will be greatly appreciated.
